A-40	40 lpm	Yes	(2) 36" H x 42" W 12" D	300 lbs each	(2) 20 amp (1) 20 amp (1) 20 amp	1.10 HP (.83kw) x (2)	80 GAL 58" H 28" D.	3400 (120 scf.)
A-30	30 lpm	Auto-Switchover Only	48" H 48" W 12" D	450 lbs	(1) 30 amp (1) 20 amp	1.50 HP (1.13kw)	80 GAL 58" H 28" D.	3400 (120 scf.)
A-20	20 lpm	Optional Auto-Switchover	36" H 42" W 12" D	300 lbs	(1) 20 amp	1.10 HP (.83kw)	80 GAL 58" H 28" D.	3400 (120 scf.)

NOTE: ADD 12" OF "FREE SPACE" ON EACH SIDE OF ALL UNITS FOR PROPER AIRFLOW AND VENTILATION.

NOTE: Electrical requirements vary depending on Model. Contact AIRNETIC for additional information.

NOTE: The 20lpm unit can be wall-mounted ONLY on properly prepared, load-bearing walls. Consult your local contractor first.

NOTE: Additional Tanks can be added to increase volume of on-site Oxygen reserve.

NOTE: All units are Air-cooled. Steel/gray metal cabinet.
Required operating environment: (34 - 104 degrees Fahrenheit)

High-Performance Hybrid Veterinary Oxygen Systems

Proudly Made
in America.

airnetic
Veterinary Oxygen Made Easy.

–High-Performance Hybrids– A Better Veterinary Oxygen Solution.

Designed specifically for today's high-volume veterinary hospital.
Powerful 165psi technology easily handles extreme oxygen demands
...without sacrificing space, purity or flow rates.

AIRNETIC™ Advanced Hybrid Oxygen Systems:

These compact, professional-grade oxygen systems, generate 20-60LPM of oxygen from a very compact footprint.

Our proprietary **Integrated Self-Monitoring Systems Technology™** is specifically designed to replace your current bottled oxygen system...including, those nagging workplace Oxygen-related safety & hazardous material issues. Everyone will appreciate the automatic, hands-off performance and easy, low maintenance.

Take a few minutes, right now, to discover how AIRNETIC'S powerful, 165psi **HP Hybrid Oxygen Technology** is saving thousands of dollars and simplifying backroom operations for veterinary practices across the Country.

AIRNETIC's proprietary, HP Hybrid integrated system technology, automatically and safely generates oxygen on site while simultaneously self-monitoring system performance, oxygen usage, flow rate, and purity. AIRNETIC Hybrids are proven to:

- 🔊 **Control monthly Oxygen costs**
- 🗑️ **Eliminate bottled or liquid tank/deliveries**
- 🛡️ **Create a safer work place**
- 🕒 **Perform Automatically, 24/7 - 365**
- 🔧 **Deliver easy, low-maintenance requirements**
- 🔊 **Be safer, quieter and more energy-efficient**

Unlike the high-decibel noise ratings produced by other oxygen generators, the small amplitude pressure swing noise generated by the AIRNETIC HP Hybrid system dramatically reduces noise pollution.

AIRNETIC's powerful 165psi Oxygen system features adjustable pressure range flexibility to ensure oxygen is supplied at the desired pressure to all drop-lines.

AIRNETIC's built-in Oxygen purity-analyzer and digital display shows Oxygen purity in real time.

An **automatic-switchover-unit** automatically switches to your back-up H-Tank(s) if needed and then back again.

Built-In Remote Purity & Pressure Alarms automatically alert staff should an unexpected drop in purity or pressure occur.

The AIRNETIC HP Hybrid Oxygen System performs safely, effortlessly and quietly behind the scenes.

Safe. Powerful. Automatic.

Automatic On/Off	✓	Designed For Veterinary Use Only	✓
Powerful 165psi Pressure Range	✓	Automatic System Exhaust/Ventilation	✓
Adjustable Pressure & Flow Rates	✓	No Oil / Oil Disposal Required	✓
Constant 50psi At All Times	✓	No Add-on Compressor Required	✓
Compact Space-Saving Footprint	✓	No Add-on Air Dryer Required	✓
Remote Pressure & Purity Alarms	✓	No Add-on Air-Supply Tank Required	✓
Visible Purity Display	✓	24/7 Emergency Tech Support	✓
24/7 Systems Monitoring	✓	1 Year Limited Warranty	✓
Independent Compressor Circuits	✓	On-site Start-Up / In-Service	✓
Flexible Installation Options	✓	No complex manifold system needed	✓
3400 Liter Reserve Tank (120 cu ft)	✓	Tank Flow-rate flexibility delivers up to 80LPM during short-term volume spikes	✓
Automatic Switchover to backup tank**	✓		

"It has more than paid for itself many times over. We wouldn't be without it."

Dr. Brian Maxwell, DVM
Adobe Animal Hospital
Los Altos, CA

"It wasn't about the money for us. We were just tired of dealing with liquid oxygen. AIRNETIC was able to produce all the oxygen we needed."

Jerod Lyons
Smith Veterinary Hospital
Santa Fe, NM

"We needed an oxygen system powerful enough to keep up with our growth. AIRNETIC was just what we were looking for."

Terry Wihlen, Facilities Mgr.
Monroe Veterinary Associates
Rochester, NY
